*Understand how the aging process places us
at greater risk for drug-related problems.
All medicines have their benefits and risks.*

*Learn when you are at greatest risk and how to recognize problems.
Common drugs can deplete your body of a host of vital nutrients essential to
your health. Learn how correcting nutrient loss may improve how you feel.*

Mission Statement: Eldercare Focus Group of Southeastern Wisconsin, Inc.

Area Professionals from varied disciplines have developed the **ElderCare Focus Group of Southeastern Wisconsin, Inc.** to help address the health, financial, legal and social issues facing an aging America. Through seminars, this group will help to educate seniors and their families in how to deal with elder life planning issues by providing peace of mind and solutions on how to maintain independence.
